

# Manitoba Nocturnal Owl Survey Routes and Owl Detection by Species in 2006

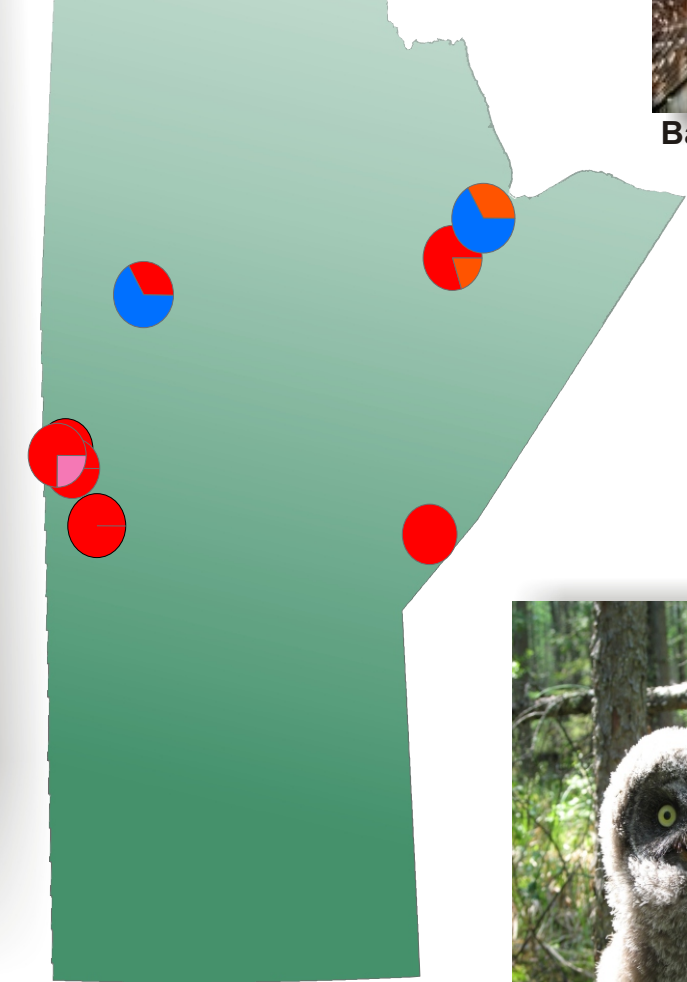

## Southern Manitoba Routes

Northern Hawk Owl

## Northern Manitoba Routes

Barred Owl

Northern Saw-whet owl (*Aegolius acadicus*) is the smallest owl in North America. This species is a forest-dwelling bird that preys primarily on mice and small rodents. It breeds in forests across southern Canada and the United States. The Northern Saw-whet was one of the most commonly heard/seen owls in the Manitoba 2006 Survey.
